Career Objective

I am a **self-taught** developer with a passion for sharing knowledge and learning new things. I want to join a **team** where I can collaborate **effectively** and contribute to achieving common goals.

Projects

Seat Exam Assignment

Spring-Boot, Spring Security, Spring Data JPA, MySQL

Repo: <https://github.com/FuuKowatty/SeatAssignment>

Application directed for teachers for easy seat assignment student for exam!

Bank App

Java, Spring-Boot, Spring Data JPA, MySQL, OkHttp

Repo: https://github.com/FuuKowatty/bank_app

Authentication, payments, creating foreign currency accounts, transfers and exchange at the current rate.

TaskManager

Next.js, Typescript, Prisma, Formik, React-Query, Recharts, Tawilndcss

Live: <http://taskmanager.bartoszmec.pl/>

Repo: <https://github.com/FuuKowatty/TaskManager>

Login-enabled CRUD app! Based on your role, you get:

Admin - User Management: Create, Edit, Delete users.

Manager - Task Management: Create, Edit, Delete tasks.

Employee - Task Tracking: Check task completion status.

Additionally, you can access chart stats for this year, showing the number of tasks completed by each employee per month.

MyBlog

Next.js, Typescript, Tailwind, Gray-Matter, React Markdown

Live: <https://blog.bartoszmec.pl/>

Repo: <https://github.com/FuuKowatty/Blog>

The project is a blog application that retrieves data from Markdown (.md) files and utilizes libraries such as Gray-matter and React Markdown to process and convert the content. It includes a home section displaying a list of blog posts, a blog content page for individual posts, and an about me page where you can get to know about me and check out my resume.
